We couldn't find what you were looking for. Try one of the links below.

- [Google Cloud home](#)
- [Google Cloud documentation](#) 🔗
- [Google for Developers](#) 🔗

However, currently, clicking the **Manage Tier** button doesn't seem to work.

Another option is to select the
Manage Cloud Project link.

Configuration

Your Cloud project is registered for noncommercial use

Change your registration details, or update to commercial use if your project no longer meets noncommercial [eligibility requirements](#).

[Manage registration](#)

Your project is signed up for the Community Tier

Update your project's quota tier if you meet certain eligibility and criteria.

[Manage tier](#)

Manage your EECU-time usage

View usage and edit quota limits, such as limits on daily EECU-time.

Monthly EECU-second usage

0%

[Manage quota limits](#)

Under the project Configuration, you will also find a **Manage Tier** button.

⚙️ Configuration ⋮

← Manage Tier

To update your quota tier, please select a new tier:

☒ **Community (current tier)**
Intended for undergraduate students and other low computation users. 150 EECU-hour limit. A billing account is not required for this tier.*

☐ **Contributor**
Intended for graduate students, nonprofits, and scientific researchers doing noncommercial work. 1,000 EECU-hour limit. An active billing account is required for this tier, but you will not be charged for Earth Engine noncommercial usage. If you exceed the quota limit for this tier, your project will enter [restricted mode](#). You will not accrue any charges for excess usage in restricted mode while your project remains noncommercially registered. [Learn more](#).*

Do you need much higher compute resources for high-impact sustainability work that generates data products that influence environmental policy and practices? Nonprofits/NGOs, university research groups, or government research groups can [apply for the Partner Tier](#). A billing account is not required for this tier.*

* If you use this project with an active billing account for other Google Cloud services, you may be charged for that usage.

Update tier

You are able to upgrade from the Community tier to the Contributor tier.

The Contributor tier provides a higher EECU-hour limit, but it also requires a billing account (with a credit card).
